ADDENDUM #1

June 21, 2019

This notice serves as Addendum 1 to the New York City Employees' Retirement System's (NYCERS) Request for Proposal ("RFP") for IT Consulting Services (ID# 04082019-ETLDev).

NYCERS seeks one (1) Data Analyst with ETL Expertise to work with the Information Technology (IT) Division for a period up to 36 months. NYCERS reserves the right to hire the candidate(s) as an employee, at no additional cost, after a period of six (6) months. The Data Analyst will primarily be responsible for detailed field level analysis, profiling and mapping of the current IBM z/VSE Mainframe VSAM files loaded into SQL tables.

All previously submitted candidates are ineligible for consideration under this Addendum. Therefore, Vendors who have already submitted candidates under the original RFP are allowed to submit up to two (2) new candidates. All other Vendors are allowed to submit up to two (2) candidates. Please note, as per the original RFP, only the first two (2) candidates will be considered. If more than two (2) candidates are submitted, NYCERS will only consider the first two (2) resumes received.

The Data Analyst must be available to work a minimum of 40 hours per week.

- 1. Mandatory Skills:** Candidates must meet all the requirements below to be considered for this position.
 - Minimum of five (5) years of source-to-target data mapping experience in a mixed Mainframe, relational database and object storage environments.
 - Experience creating and/or maintaining ETL applications.
 - Experience migrating mainframe VSAM files to relational and/or dimensional SQL databases.
 - Experience working in multiple development environments/systems: IBM Mainframe, Windows Server, UNIX and SQL Server.
 - Strong SQL knowledge working with complex queries and stored procedures.
 - Proficiency in mainframe applications encompassing COBOL, VSAM and DB2.
 - Experience creating data dictionary documentation and data definitions/domains.

- Excellent interpersonal, communication, presentation, writing, analytical, problem solving, and information gathering skills along with fundamental technique troubleshooting abilities.
- Strong analytical skills demonstrated by the ability to receive and analyze requirements and propose a suitable solution that adheres to the team's methodology.

2. Preferred Experience:

- Experience with Data Quality/Profiling tools.
- Experience extracting business rules from the existing legacy code.
- Experience with Data Warehouses and/or Data Marts.

The determination for award shall be made to the responsible proposer(s) whose proposal is determined to be the most advantageous to the New York City Employees' Retirement System and the City, taking into consideration the price and such other factors or criteria that are set forth in the RFP.

Please note the revised timetable below. For information about the RFP, please refer to the Original RFP for IT Consulting Services and procedures (attached).
